The Hospital for Sick Children

AND

The Lakeside Home

FORTY-FOURTH ANNUAL REPORT

In this Forty-fourth Annual Report of the Hospital for Sick Children is a record of service which surpasses that of any previous year. The Trustees hope that its claims will make a stronger appeal to the child-loving people of the Province than ever before to carry on the good work, and urgent plea is made to the liberality of its friends.

While the world-wide increase in the cost of living could not fail to affect this hospital, yet it is noted that the daily cost of caring for each sick child was, by strict economy, kept within thirteen cents of last year's figures; and it is because of the larger number of little patients who occupied the Hospital wards, a daily average of 223, as against 192 in 1918, that the financial statement shows an increase of \$19,205 in the amount of the bank overdraft. Thus the deficit on maintenance account is now \$109,043.72.

The Trustees believe that a knowledge of the work accomplished should inspire the public, both of large means and small, to a generosity which will never allow debt to cripple the Hospital's manifold service to suffering children.

A GLANCE AT THE PAST 12 MONTHS' WORK.

The work last year passed the record. The number of patients was greater than in any previous year, and the work in every department increased.

From the 1st of October, 1918, to the 30th of September, 1919, the total number of patients admitted was 5,065, an increase of 17 over 1918. Of these 2,260 were girls and 2,805 boys; 1,901 were medical cases and 3,147 surgical.

The largest number of in-patients treated in any one day was 280; the smallest, 173; and the daily average, 223.

Of the total 5,065 in-patients, 760 were admitted from 271 places outside of Toronto. In 1918 there were 759 from 266 places.

The total number of out-patient attendances was 36,697. Of these 15,496 were girls and 21,201 boys.

The largest number of out-patients treated in any one day was 268; the smallest 84; and the daily average 110.

The total number of surgical operations performed in 1919 was 5,257, an increase of 1,073 over the previous year; in the in-patient department 3,008, and in the out-patient 2,249, where also many minor operations were performed which are not tabulated.

SIXTEEN DAYS IS AVERAGE STAY.

The total number of days' treatment for 1919 for the 5,065 in-patients was 79,461. The average days' stay of each patient was 16. The previous year the total number of days of Hospital care was 70,153, almost 10,000 less.

This average days' stay is found by dividing the total number of in-patients, 5,065, into the total days' stay, 79,461, of all patients in the Hospital for the year.

RECORD NUMBER OF PATIENTS.

The tabulated returns show the work accomplished in other departments. The total number of patients treated was 5,065 in the wards, and 36,697 in the out-patient clinics. The total expenditure was \$335,399.39, which works out, for purposes of easy comparison, at \$3.44 per day per cot patient, and that is just thirteen cents more than last year, which, in view of the universally higher prices and the urgent necessity for many repairs, proves praiseworthy economy on the part of the Hospital staff.

TUITIONAL EXTENSION.

By the average citizen a hospital is usually thought of as a great sick room. The direct care of the patients is a feature which makes the most natural and immediate appeal to the philanthropic sentiment, and the care of children, most of all; and yet there are other phases of the work of the Hospital for Sick Children whose results tend to aid and strengthen not only children but adults as well throughout the province.

The clinics for medical students, held daily by foremost physicians and surgeons, ensure not only to the patients the best skill anywhere available, but also furnish the doctors of to-morrow an advanced knowledge of the healing art, which inevitably makes for the physical welfare of the entire province; while the University of Toronto has come to a full realization of the value of the tuitional side of hospital work, and by a liberal system of endowments has made it financially possible for several of its professors in medicine to place a great portion of their time at the disposal of the hospital. Though the Hospital for Sick Children, in accordance with its settled policy, retains its full independence from any measure of outside control, a method of close co-operation with the University has been evolved, from which may be safely foretold gratifying results in the near future.

This is an educational event of prime importance, and the Trustees desire to place on record their lively recognition of the broad vision and public spirit of Sir John Craig Eaton, whose splendid gift to the University of Toronto has allowed this institution to increase its professional personnel in a way which would not have been otherwise possible.

NURSES AND SOCIAL SERVICE.

The training school for nurses of the Hospital for Sick Children affords young women an unsurpassed preparation for the noble profession which they are to carry on in the city and province. Here the Hospital has linked in with Public Health work, and the method of co-ordination between the Hospital, the schools and the homes has been paid the compliment of imitation in several municipalities. Every Medical Officer of Health in Ontario knows the value of this phase of the work, and the system employed is being very generally adopted, but without an unfailing supply of thoroughly equipped graduate nurses it must fall short of success. The public, therefore, cannot fail to recognize the claim of the school for the generous support necessary to maintain its notable efficiency.

THE TRAINING SCHOOL FOR NURSES.

A candidate should remember that there are great differences in the various Training Schools for Nurses, and she should select the best school that her qualifications entitle her to enter. The best schools are those that have the most experience to offer; the best equipped teachers and classrooms; that do not overwork the pupils; that furnish good living conditions; that look after sick nurses carefully; and that prepare pupils adequately for more than one branch of nursing. The prestige of the school and reputation of the alumnae should be carefully considered. The location has also much to do with the opportunities a pupil may enjoy when off duty.

The Training School of the Hospital for Sick Children offers a very thorough and complete training. At the end of the three years' course the graduates from this school are fully qualified to take their place with other nurses, and stand second to none in the profession.

The universal recognition of the importance of the nursing of children is evidenced in the fact that application was made, and we are accepting pupil nurses from three different hospitals, in order that they may obtain some experience in the nursing of sick children.

Numerous applications for post graduate work have been received during the past year, and at present a graduate nurse from Vancouver is taking a six months' course.

It is obvious, therefore, when graduate nurses are applying for a course in children's work, that the value of the training which the Hospital for Sick Children offers cannot be overestimated.

THE MECHANICS OF MEDICINE.

Only a visit to the Hospital would convey an idea of the immense amount of modern equipment required by a hospital. The Pasteurizing plant, for instance, has a daily output of almost two thousand bottles of germless milk and baby feedings; and the laundry handled over 2,000,000 pieces in the past year, not merely washing, but sterilizing them as well. The refrigerating plant produces each day the equivalent of 12 tons of ice.

X-RAY EXTENSION.

As a token of the true friendship shown them by Sir John Craig Eaton, the employees of the T. Eaton Co. have presented in his honor a much-needed addition to the X-Ray Department. This is now under the direction of Dr. A. H. Rolph, and the Trustees are confident that not only will the amplified service meet all the Hospital's own requirements, but that a considerable revenue will be derived from plates and fluoroscopic readings for outside cases. Sincere gratitude is felt towards the donors, who gave permanent expression of their good-will towards their employer by following him into the field of his own benefactions—the welfare of the sick and needy.

Dr. J. H. Erb has been placed in charge of the Pathological Department. From the examinations made here come the clues which enable the visiting staff to solve pathological problems, and thus contribute to both medical advance in general and to the Hospital's high record of cures in particular.

LAKESIDE HOME RE-OPENED.

This year, for the first time since the outbreak of war, the Lakeside Home for Little Children—the summer annex of the Hospital—was re-opened, and this was made possible by the generosity of Sir Edmund Osler, who was insistent that the convalescent patients should not be denied their longed-for outing. Owing to the press of applicants for hospital care, the city institution was also kept going during the summer at about full capacity. On one day there were 105 children at the Lakeside Home and 183 at the main hospital. The total number of youngsters who benefited by the lake breezes was 273.

COTS NAMED DURING YEAR.

For \$2,000, in perpetuity, at H. F. S. C.	6
For \$100 annually, at H. F. S. C.	8
For \$500, in perpetuity, at Lakeside Home	1
For \$25 annually, at Lakeside Home	10

A cot in the Main Hospital was endowed through the gift of \$10,000 Victory Bonds by the employees of the T. Eaton Co., Limited, Toronto.

A complete list of named cots is shown on pages 12-14 of this report.

BEQUESTS IN THE YEAR.

The Trustees acknowledge, with thanks, bequests from the estates of: Chas. Durant, Chesterville, \$85.23; Wm. Warren, Montreal, \$260; H. James, Brantford, \$250; H. Woods, Aylmer, \$76; R. R. Newborn, New Toronto, \$19.40; D. Clark, Toronto, \$100; S. W. McClung, Sonya, \$12; Jermyn and J. Edgeworth, \$331.12; L. J. Cosgrave, Toronto, \$333.33; P. Doherty, Collingwood, \$169.17; Wm. McConaghy, Toronto, \$500; S. A. Crawford, Toronto, \$200; Annie Hamilton, Toronto, \$2,017.54; Jos. Maunder, Lindsay, \$100; A. Leslie, Durham, \$100; Benj. Milgate, Bradford, \$25; Julia S. Hart, Toronto, \$50; Mrs. E. B. Millard, Toronto, \$100; Alex. McMann, Port Hope, \$199; W. P. Innes, Simcoe, \$25; M. A. Janes, Toronto, \$25; S. R. Hanna, Toronto, \$100; Mrs. L. McLean, Kingsville, \$500; Emeline C. Muller, To-

ronto, \$249.04; Rebecca Williams Reid, Trenton, \$200; Helen M. Winn, Toronto, \$100; S. W. Smith, Preston, \$116.90; P. J. Dillon, Lambton Mills, \$500; Henry Graham, Lambton Mills, \$100; Jas. A. Perry, Toronto, \$46.53; Wm. Logan, Toronto, \$294.67; Caroline Kellar, Napanee, \$1,654.85; Mrs. E. Mallory, Percy Tp., \$50; J. Ross Robertson, Toronto, \$13,636.75; Mrs. R. T. Whiteside, Lindsay, \$200; W. D. Cheves, Paisley, \$200; J. E. Morrison, Penhold, Alta., \$900; Hannah E. Cross, Norwich, \$500; Mrs. Margaret Pearce, Toronto, \$50; D. J. Smith, Tp. of Grimsby, \$100; A. D. McGugan, Aldborough, \$995; Geo. Paterson, Almonte, \$500; Jos. H. Deeks, Welland, \$500; H. L. Lovering, Coldwater, \$2,000; Phillis Wilkinson, Hillsboro, \$1,000; Mrs. de Lagran, Niagara-on-the-Lake, \$100; John Trick Estate, Toronto, \$1,062.50; Rev. Geo. Leech, Toronto, \$200; Maurice M. Vardon, Toronto, \$25; Mrs. R. T. Whiteside, Lindsay, \$200; Mrs. Geo. Washington, Stouffville, \$50. Total, \$30,959.03.

DEPENDENT UPON THE PUBLIC.

The Hospital has no endowment fund to fall back upon. To avoid possible misunderstanding, the Trustees desire to inform the public that it draws nothing from any joint appeals made on behalf of the federated charities of Toronto. More than half the Hospital's daily income must be derived from private benefactions.

Every minute fifty cents must be found to keep open the doors of a great charity, which have never been closed against any sick child.

In view of the record of service shown by this forty-fourth annual report which the Trustees have now the honor to submit to their fellow-shareholders in this great and open corporation of child welfare, it is confidently expected that the money necessary to carry on will be forthcoming in abundant measure.

Lakeside Home Re-opened

Following the destruction by fire of the original Lakeside Home, in April, 1914, it was decided that better results would follow the unit system of construction. Besides the Administrative Buildings and Staff Residences, five separate Pavilions have been erected, each with its own diet kitchen, etc.

The completion of the plan was delayed by war conditions, but next summer will find the Lakeside Home again performing as great service among convalescent children as the main institution does among their more seriously ill companions.

AUDITORS' REPORT, HOSPITAL FOR SICK CHILDREN.

To the Chairman of the Trust, Hospital for Sick Children:—Dear Sir,—We beg to certify that the Receipts and Expenditures of the Hospital for Sick Children have been carefully audited, with the books, vouchers and bank account throughout the year ending September 30th, 1919, and we have verified the securities, and the accompanying statement of Receipts and Expenditures and Assets and Liabilities, bearing our signature, are a true and correct account of the affairs of the Hospital to that date. Respectfully submitted,

A. C. NEFF & CO., Chartered Accountants.

Remember the Sick Children in Your Will

Read the names of those who have memorial cots. \$2,000 names a cot in perpetuity. If you cannot find a cot, leave something—if only a hundred dollars—to help to nurse sick little ones. The form to use is—"I Give, Devise and Bequeath to The Hospital for Sick Children, Toronto," the sum of

BOYS' SURGICAL WARD

AN AUTO VICTIM

SURGICAL OPERATIONS

Table Showing Nature of Surgical Operations from Oct. 1st, 1918, to Sept. 30th, 1919.

Operations	Total	Operations	Total
Removal of glands in neck	36	Fracture of tibia and fibula (reduction)	14
Amputation of fingers	2	Fracture of tibia and fibula (open reduction)	2
Amputation of foot, toe	5	Fracture of tibia (reduction)	9
Amputation of leg	5	Fasciotomy	28
Trimming of amputation stump	2	Tenotomy	15
Fixation of joint	21	Tendon fixation	16
Circumcision	10	Tendon transplantation	15
Hypopspadias	2	Tendon lengthening	40
Recto-Vaginal fistula	1	Sequestrectomy	12
Anal fistula	2	Skin graft	6
Undescended testicle	2	Transfusion	95
Imperforate anus	1	General wounds (repair)	10
Curettetment of bone	5	Cleft palate (repair)	20
Decompression (trephining)	1	Hare-lip (repair)	26
Urethra (plastic operation)	1	Hare-lip and cleft palate (repair)	2
Excision of astragalus	1	Resection of rib	32
Excision of scar	10	Intercostal drainage	12
Cyst (removal)	10	Thoracotomy	2
Tumor (removal)	11	Eye, Ear, Nose and Throat—	
Tooth (removal)	3	Enucleation	9
Naevus (removal)	4	Needling of cataract	12
Fixation of scapula to ribs	1	Resection and tenotomy of rectus	39
Meningocele (removal)	5	Iridectomy	10
Foreign body (removal)	3	Skin graft	10
Incision of abscess	60	Advancement of externus rectus tendon	13
Incision of abscess (T.B.)	18	Canthotomy	3
Cellulitis	4	Plastic operation	1
Osteomyelitis	13	Cyst (removal)	1
Appendectomy	57	Incision of abscess	2
Intussusception	13	Excision of lacrimal sac	3
Pyloric stenosis	11	Breaking down ant. synchia	1
Laparotomy	6	Submucous resection of nasal septum	40
Peritonitis	4	Mastoid	52
Hydrocele	4	Adenoids	17
Hernia (Inguinal)	88	Tonsils and adenoids	1773
Hernia (Femoral)	1	Trimming of turbinates	9
Manipulation of feet	20	Incision of abscess (post. auricular)	4
Osteotomy of ant. superior spine	1	Dilation, at stricture of oesophagus	3
Osteotomy of femur	11	Foreign body in oesophagus (removal)	12
Osteotomy of tibia	19	Dilation, at stricture of larynx	6
Albee spinal bone graft	4	Polyp of larynx (removal)	2
Plaster jackets	5	Plastic operation on pharynx	1
Torticollis	3	Foreign body in bronchus (removal)	1
Plastic operation for contracture following burn	1	Bronchoscopic examination	10
Plastic operation for webbed fingers	2	Fracture of nose (reduction)	1
Removal of ant. superior spine of illum.	1	Foreign body in nose (removal)	1
Fracture of femur (reduction)	34	Retro-pharyngeal abscess (incision)	2
Fracture of femur (open reduction)	3	Papilloma of vocal cord (removal)	1
Congenital hip (reduction)	13	Aural polypus (removal)	1
Fractures (bone plating)	6	Drainage of antrum	2
Fracture of clavicle (reduction)	1	Inflammation of ethmoidal cells	2
Fracture of humerus (reduction)	32	Paracentesis	2
Fracture of humerus (open reduction)	8	Total	3008
Fracture of radius and ulna (reduction)	8		
Fracture of radius and ulna (open reduction)	2		

SURGICAL OPERATIONS IN OUT-PATIENT DEPARTMENT—1918-1919

Removal of tonsils and adenoids	1707	Excision of cyst	5
Removal of foreign body from foot, arm	8	Excision of naevus	8
Removal of foreign body from nose	6	Paracentesis	65
Removal of finger tip	1	Reduction of fracture forearm	80
Removal of toe	1	Reduction of fracture leg	17
Removal of angioma	11	Wounds sutured	38
Removal of mole	3	Manipulation (club-feet)	20
Incising abscesses	102	Manipulation (bow-legs)	1
Incising infected arm, hand	10	Incising tendons	8
Incising infected foot	6	Circumcisions	140
Incising infected glands	10		
Excision of ganglion	2		2249

NAME

ADDRESS

Christmas, 1919

What will be your share in the noble work of saving hundreds upon hundreds of sick and crippled children from having to eke out drab, ineffectual lives, burdens to themselves and the community alike?

The heritage of every Ontario child should include a fair start in life; the Hospital for Sick Children exists to remove the handicaps imposed by disablement or disease.

War conditions have left this great institution heavily in debt, and its present revenue will not suffice to keep pace with the increasing demands for this service from all parts of the province.

An unfailing income of 50 cents a minute is needed. Whether it be a widow's mite or a millionaire's gift, will you send to the Secretary some token of your sympathy with the sweetest of all charities—that which ministers to stricken children?
